STRONG | SECURE | SUPERIOR

The products, pedigree and support to

# add value to your portfolio

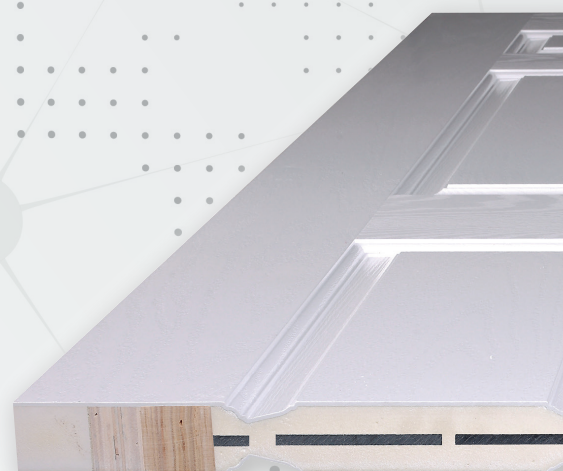

## A PROVEN PEDIGREE

At ODL Europe, we build value into building products and raise the bar on product quality and performance.

Based in Bootle, Liverpool, we are part of the global ODL corporate business whose roots stretch back over 70 years and who support our commitment to product and service excellence.

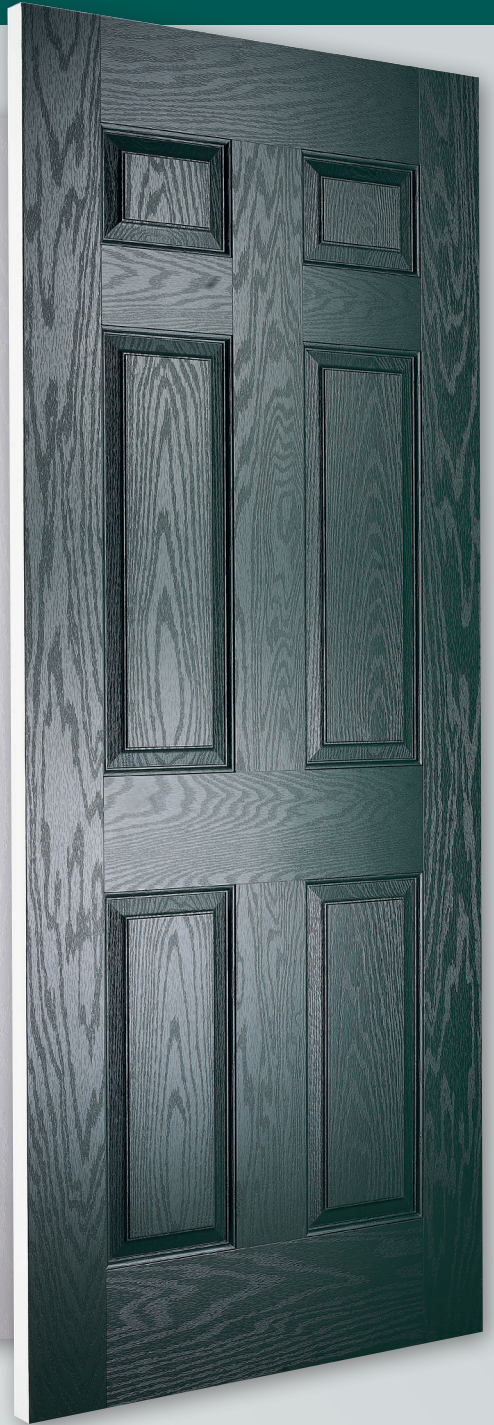

ODL Europe is the exclusive UK partner of Capstone Engineering Ltd and Capstone composite doors come with an impressive set of credentials. Our Capstone range of PAS 24:2016 accredited composite doors offers a wide selection of styles, colours and quality that stands our doors apart from the competition.

**In ODL Europe you have the products, pedigree and support to add value to your portfolio.**

# Capstone SecureDesign™ Door Slab

Manufactured using polypropylene, the **Capstone SecureDesign™ Door Slab** is at the heart of all our doors and gives you a clear competitive advantage.

## **Surpasses PAS 24:2016 accreditation**

With improved foam flowability, SecureDesign™ door slabs have been designed to create fewer areas of vulnerability and deliver superb security.

## **Delivers fatigue resistance**

Polypropylene retains its shape even after torsion, bending and / or flexing. Plus the reduced timber content eliminates the potential to bow.

## **Offers recycling opportunities**

Thermoplastics such as polypropylene can be heated to their melt point without degrading, making them ideal for recycling.

And as well as all the advantages, it's similar in weight to LVL and machines like LVL for consistent fabrication practices.

# 6 Panel Combi Door

## **Makes exceptional business sense**

Frees up warehouse space and improves cash flow.

## **Saves time and money**

Pure PVC composite rail means there's no need to edge band or fit a secondary edge finish.

## **Offers superb aesthetics and durability**

The woodgrain is taken from real oak woodgrain and achieves some of the UK's best adhesion and UV stability ratings.

**We also offer a comprehensive range of composite door slabs to suit all door style solutions.**

**One slab  
- 7 styles!**

# FD30 Fire Door

All the quality,  
aesthetics and security  
of a Capstone Door Slab  
- with the **additional  
benefit of passing  
the PAS 24:2016  
30-minute  
fire test.**

# TriSYS Three Piece Frame System

## Offers quick and easy installation

No preparation, no adhesion promoter and no special primers - simply snap together.

## Delivers an aesthetically appealing finish

Available in White, Red, Green, Blue, Black, Oak and Rosewood, all with no screw hole covers to give a more attractive door.

## Meets security requirements

PAS 24:2016 as standard and Secured by Design as an option.

The market leader and only one of its kind!

# A service designed to **grow** your business

## **We deliver...** the services you need

Our new in-house door prepping facility offers a **full prepped service for your convenience**. We offer prep for your door lock, letterplate and door hinges. Open in and open out options too. The flexible facility delivers a personal choice from sizing the door on our beam saw to a full prepped door service with or without edge band. *Whatever your prep needs are, we have you covered.*

## **We work together...** as a team

Our aim is to secure long-term partnerships with our customers by delivering excellence at every interaction. **We're committed to supporting your business** and working together as a team to help you achieve your ambitions.

## **We invest...** in our infrastructure

We recently launched a **new online portal** to make *quoting and ordering quicker and easier* and we've just commissioned a further 15,000 sq ft of manufacturing space at our Bootle headquarters to increase capacity and help us drive further efficiencies.
